

Press release
21.03.24

“The GreenEduLARP project is in its final stretch before completion”.

The collaborative efforts of the partner team from Estonia, Greece, Sweden, and Poland within the GreenEduLARP project are currently in full swing. With a shared commitment to excellence, each member is deeply engaged in refining and optimizing the project outcomes. This phase is characterized by a significant degree of intensity as partners allocate substantial resources and energy towards the meticulous enhancement of educational materials tailored for teachers.

Comprising a comprehensive suite of resources including the Teachers Toolkit, Lesson Plans, and an engaging Audiovisual Hub, these materials are being fine-tuned to cater to the diverse pedagogical needs of educators. Concurrently, the team is actively engaged in facilitating training sessions aimed at empowering educators with the requisite skills and knowledge to effectively implement the EduLARP methodology in their teaching practices.

GreenEduLARP team is dedicated to promoting the widespread adoption of the EduLARP methodology, recognizing its potential in addressing critical topics such as

Climate Change Education. Through their collective efforts, they aim to sensitize young minds to the pressing issues concerning our planet's future.

Additionally, the team is on the verge of completing the development of supplementary materials for educators. These resources, meticulously crafted to complement the core EduLARP methodology, are soon to be translated into Estonian, Swedish, Greek, and Polish languages, ensuring accessibility to a broader audience of educators.

With the impending dissemination of these resources, the team is optimistic about their potential to serve as invaluable assets for educators worldwide. By sharing these materials, they aspire to empower a multitude of educators to integrate the EduLARP methodology seamlessly into their teaching practices, thereby fostering engaging and impactful learning experiences for students.

Before the project concludes, a very important event awaits GreenEduLARP team, known as the multiplier events - EduLARP training for a large group of teachers, trainers, and educators. Each partner is obligated to conduct this event in their own country. Reports from these events will be available soon.

GreenEDULARP: Green Actions in School using Educational Live-Action RolePlaying (EduLARP)”

- Project Number: 2021-1-EE01-KA220-SCH-000032573
